## THE LATEST IN WATER-REPELLENT TECHNOLOGY

### THE LATEST IN WATER-REPELLENT TECHNOLOGY

Protect your fabrics from water, grease and powder stains with this newest development in fluid-repellent fabrics. Our C6 finish chemically binds with the fibres, providing a natural and very durable coating which makes any sort of fluid bead and thus easy to rinse off. Being infinitely versatile, this finish is your go-to solution for a wide array of applications, from furnishing fabrics to the premium active sportswear.

#### BENEFITS OF OUR WATER REPELLENT TECHNOLOGY

PFC FREE

WATER AND OIL  
REPELLENT

DOESN'T ALTER  
FABRICS SMOOTHNESS

RETAINS THE FABRICS  
BREATHABILITY

#### HOW DOES IT WORK?

Using an innovative multifunctional molecular structure based on silica, the latest generation in water and oil-repellent finishes uses C6 technology and steers **clear of PFC's**, making it a much more durable solution than ever before. Furthermore, this development stands for a **natural protection from rain and grease, yet guarantees the fabric retains its breathability**, which isn't the case with waterproof coatings.
